

I'm Jeong-Yun from Nonsan city where is famous with
Military bootcamp. I graduated ^{from} Hanil High School in
Gongju-city nearby my hometown. The school is male-
only and its students must live in ~~the~~ dormitory before
their graduation. The experiences in the school affected
many things ^{about} ~~of~~ myself such as characteristics, ideal value,
etiquettes and the way to keep calm & carry on. The curriculum
of the school is enough to make me ~~hard~~ ^{the}, but it helped
me to grow up to ^{the} next step, simultaneously. I'm living
in ^{the} SeoulTech Dormitory with my roommate. His major
is IISE ^(IT). In my hometown, my family lives ~~in~~ ^{at}. Parents,
a brother, and my cat. I love them all. Sometimes, I
upload my cat's photos and videos ~~in~~ ^{on} his youtube ^{channel} and Instagram.
I play the drums, and I like to watch sports games
in my free time such as football (soccer), FI, and baseball.
Unfortunately, I don't speak any ^{other} ~~extra~~ languages.
I only speak Korean and English.

Actually, I chose this university due to my $\frac{15}{20}$ (K-SAT)

~~score~~ ~~grade~~. Also, I preferred Machine Engineering ~~than~~ ^{to} Computers

and management. However, I was not sure I ~~can~~ ^{could}

take Physics and mathematics well for at least 4 years.

So, I searched other major except machanics, then I found

ITM. The description of IT + Management and ~~the~~ ^{double}

degrees with Sealtch and Northumbria was ~~appealed~~ ^{appealing} to me.

In fact, Korean style of learning English is biased to reading

and listening. Moreover, listening is very low level until

high school. During this semester, I hope ^{to} learn

practical skills for daily & career situation ~~in~~ ⁱⁿ various.

After graduation, ~~I~~ ^{I have} not get the ~~note~~ ^{path} of my career yet.

~~However~~ ^{But}, I want to be a developer, ~~so~~ ^{so}, I tried to

get good skills for my target.

Thank you for reading.
